# MOHIT SHARMA

I am an IBM certified data scientist, with a 2 years of industry experience. I like to crunch numbers and present them in an intuitive and artistic manner to tell a meaningful digital story. I am well versed with data science algorithms and regression practices.

Currently searching for a data science position that allows me to build tools using visualization and machine learning to help people explore and understand their data.

## ACHIEVEMENTS

Oct-2019

**Winner in Special Category: CSIS Hackathon**

Astrazeneca

- Won the prize in special category in intra company hackathon contest (~30 participants)
- Developed a product to predict the estimated server utilization using timer series modelling, this helps in right sizing of server

Sep-2019

**Python: HackerRank Leaderboard**

HackerRank

- Holds the rank of 1814 out of 751800 (top 0.25%) on the python leaderboard of Hackerrank

Aug-2019

**Top Prize: Pluralsight Skill Challenge**

Astrazeneca

- Won the top prize for the highest skill IQ in an intra company contest (among ~2500 employees)

## EDUCATION

Jul-2017 | Jul-2013

**B.Tech, Civil Engg**

IIT Madras — Chennai, TN

- Graduated with a minor in Management Studies
- Graduated with an overall CGPA of 7.21/10

May-2013 | Jul-2012

**XII (CBSE)**

Vijayvergiya Bal Vidyalaya — Kota, Rajasthan

- Graduated with an overall grade of 92.2%/100%

May-2011 | Jul-2010

**X (CBSE)**

Kendriya Vidyalaya — Gurugram, Haryana

- Graduated with an overall CGPA of 10/10

## PROJECTS

## SKILLS

- R
- Data Analytics
- Data Visualization
- Agile
- Microsoft PowerBI
- Data Science
- Machine Learning
- Python
- MySQL

*Made with the R package **pagedown** and github.com/nstrayer/cv.*

*Last updated on 2019-12-18.*

Dec-2019 | Jul-2019

### TidyTuesday

Github

- Frequently participate in an online community competition of data visualiztion by R4DS

Oct-2019

### Data Science Question a Day

Github and Twitter

- Managing the twitter and github repository of Data Science Question a Day
- Using social media to teach concepts of data science by posting multiple choice question on twitter along with solution in blog post
- In a short span of 3 months, garnered 500+ followers, with an average monthly reach of 70,000+

Sep-2019

### Capstone Project

Github

- Developed a text based image search engine as a part of Python 3 specialization's capstone project
- Using text input as a search parameter the engine produces the relevant facial images

Jul-2019

### Looking through the jobs of NYC

Kaggle

- Conducted an exploratory data analysis into the jobs of New York City using R

Jun-2019

### Learn New Words

Google Assistant Action

- Developed a chatbot on Google's Assistant platform using Dialogflow to help students improve vocabulary for competitive exams like GRE
- The chatbot flips the traditional way of learning through flash cards, rather uses fill in the blanks similar to exam's questions
- The chatbot has an extensive vocabulary of 4000+ words and sentences, using them in a interactive quiz style

I regularly blog about data science concepts and R programming on my blog Data Science Question A Day and occasionally explore publicly available data on kaggle.

## SPECIALIZATIONS

Sep-2019

### Python 3 Programming

University of Michigan — Coursera

- Successfully completed a 5 course online specialization program, including capstone project
- Achieved an overall average grade of 100%

Mar-2019

### IBM Data Science Professional

IBM — Coursera

- Successfully completed a 9 course online specialization program
- Achieved an overall average grade of 96%

Feb-2019

### Statistical Learning

Stanford Online

- Successfully completed the Introduction to statistical learning course offered by Rob Tibsherani and Trevor Hastie
- Achieved a grade of 103% (includes bonus marking)

Feb-2018

**Advanced R Programming**

Jhon Hopkins University — Coursera

- Successfully completed the Advanced R Programming course offered by Roger D. Peng on Coursera
- Achieved a grade of 97.5%
- In top 10% on platform by popularity.

I am passionate about education and self learning. I keep myself up-to date with latest skills in demand by regularly engaging in online courses.

## INDUSTRY EXPERIENCE

Dec-2019 | Oct-2019

**Product Analyst**

Astrazeneca, Cybersecurity and Infrastructure Services — Chennai, TN

- Partnering with vendor (commvault) and IT to deploy analytics solution to analyze back up data to optimize storage infrastructure
- Working with business stakeholders and vendors to assess sensitive data analyzer tools, to find sensitive information in the applications
- Defining and implementing performance metrics, for the 30+ member agile team
- Managing the innovation development and delivery for 70+ member team, ensuring timely delivery using agile framework

Sep-2019 | Mar-2019

**Business Analyst**

Astrazeneca, Cybersecurity and Infrastructure Services — Chennai, TN

- Collaborated with vendors, IT and Business to assess tools to analyze and optimize storage infrastructure
- Envisioned, prototyped and implemented an innovation management framework, including an online platform to submit and share ideas

Feb-2019 | Aug-2018

**Data Analyst**

Astrazeneca, Cybersecurity and Infrastructure Services — Chennai, TN

- Build an ETL pipeline (using MySQL DB, Excels) and forecasting model in PowerBI, to streamline and automate the capacity management process
- Conducted an exploratory data analysis (in R) on 2 years of project management data, suggested focus areas for investment to reduce delivery time by utmost 50%
- Streamlined and automated the analytics and reporting of project management team using PowerBI, saving ~100 manhours annually

Jul-2018 | Mar-2018

**Enterprise Architecture Analyst**

Astrazeneca, Commercial IT — Chennai, TN

- Conecptualized a Business Architecture Framework (inspired from TOGAF) to improve the portfolio planning, making sure IT portfolio is aligned with Global Business objectives
- Conducted the impact analysis of 7 local application of Astrazeneca India on business to help speed up the process of rationalization

Feb-2018 | Jul-2017

**Data Scientist**

Astrazeneca, Commercial IT — Chennai, TN

- Developed a text classifier using SVM with an accuracy of ~80% to classify incidents in 17 categories
- Streamlined the process of root cause analysis by incorporating the model, saving ~ 3 manhours weekly

I have worked in a variety of roles ranging from data analyst to business analyst to data scientist. I like collaborative environments where I can learn from my peers.
